

Lowpoly Style Ultra Pack – Readme V1.21

Thank you very much for purchasing my pack! I hope it is useful to you. Please check out this short readme to get you started.

Free HDRP & URP Support Packages

While you can use Unity's "Edit->Render Pipeline->Upgrade Project Materials", but I recommend just using the HDRP and URP packages that I made – they can be downloaded from the asset store for FREE if you own the standard-shader Ultra Pack!

HDRP: <http://u3d.as/26oj>

URP: <http://u3d.as/1X1n>

Post Processing for Standard Pipeline

To get the same look as in the screenshots, please use the included post processing profiles. Enable post processing by downloading the newest post-processing stack via the package manager in Unity, via the asset store or from github, then assign the profiles.

I am not allowed to include the post processing stack packages in asset store submissions, please refer to the resources below if you do not have experience with setting up post processing in Unity.

Depending on the version of the post processing stack (V1 or V2), you must use the profile labelled V1 or V2.

All profiles can be found directly next to the demo scene of each theme.

IMPORTANT: Please use linear color space for proper results. (Project Settings > Player)

Further info here:

<https://docs.unity3d.com/2018.3/Documentation/Manual/PostProcessing-Stack.html>

<https://docs.unity3d.com/Packages/com.unity.postprocessing@2.2/manual/index.html>

Post Processing for HDRP / URP

HDRP and URP packages include post processing directly.

Lightmapping

To get the best results, you can lightmap the scene with rather low settings (this is the case on many of the screenshots).

Contact

If you have questions, need help or have ideas for new packs please contact me.

- Email: chunityassets@gmail.com

- More packs: <https://assetstore.unity.com/publishers/5166>

If you like the assets, it would be awesome if you would consider rating them in the asset store.

Thanks again for your purchase,

CH
